To whom it may concern,

Amazing Custom Fabricators has been a supplier to Ardron-Mackie Limited since April 2004.

In that time they have done laser cutting of various sizes of aluminum and steel, brake forming, welding and complete assembly for us.

We are a manufacturer of high-end lighting fixtures, and our customers expect top quality products from us.

Fred Lai, and all the people in his organization, really take pride in what they do, and it shows in their work.

They have provided us with top quality and service. Always pushing to make things better and to improve and all aspects of the relationship.

I would highly recommend Amazing Custom Fabricators to anyone looking for a high quality job, quick turn around, and very competitive pricing.

I look forward to working with Amazing for many years to come.

Tony Visconti, C.E.T  
Engineering Services Manager  
Ardron-Mackie Limited
